P29320

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all previous versions and listings of claims.

Listing of Claims

- 1.-10. (Cancelled)
- 11. (New) A method for treating aneurysms, comprising wrapping an aneurysm of a patient with a material that is composed of a polymer material containing carbon as a constitutional element and that is produced by modifying at least a portion of the surface thereof by particle bombardment.
- 12. (New) The method according to claim 11, wherein the polymer material containing carbon as a constitutional element is expanded polytetrafluoroethylene (ePTFE), polylactic acid, silicone, or silk.
- 13. (New) the method according to claim 11, wherein modification by ion bombardment is carried out by ion implantation using an ion beam with an acceleration energy that is between 1 keV and 2 MeV.
- 14. (New) The method according to claim 11, wherein modification by ion bombardment is carried out by ion implantation within a dose volume φ such that $1 \times 10^{12} \le \varphi \le 1 \times 10^{17}$ ions/cm².
- 15. (New) The method according to claim 12, wherein modification by ion bombardment is carried out by ion implantation using an ion beam with an acceleration energy that is between 1 keV and 2 MeV.
- 16. (New) The method according to claim 12, wherein modification by ion bombardment is carried out by ion implantation within a dose volume ϕ such that $1 \times 10^{12} \le \phi \le 1 \times 10^{17}$ ions/cm².

P29320

- 17. (New) The method according to claim 13, wherein modification by ion bombardment is carried out by ion implantation within a dose volume ϕ such that $1 \times 10^{12} \le \phi \le 1 \times 10^{17}$ ions/cm².
- 18. (New) The method according to claim 15, wherein modification by ion bombardment is carried out by ion implantation within a dose volume ϕ such that $1 \times 10^{12} \le \phi \le 1 \times 10^{17}$ ions/cm².
